metal detectors.

AUTOMATIC STORAGE LOCKER

Storage locker for security entrances

This Locker has been designed for storage to be placed near the entrance of protected areas with Security Booths equipped with Metal Detectors. It is manufactured in mild steel sheet with 15 mm thick doors. The main feature of this product is its self-managed operation (automatic). On request, it is possible to manufacture its structure in a non-magnetic material.

GENERAL FEATURES

- Storage locker made up of 30/10 mild steel structure painted with highly shock and corrosion-proof products.
- Embossed painting, any color from RAL Chart.
- Doors in non-magnetic material.

BASIC EQUIPMENT
