

FOXPASS II SYSTEM

Anti-hostage control system
and/or transit counter

Easy to use.

Interfaceable with any traditional access control.

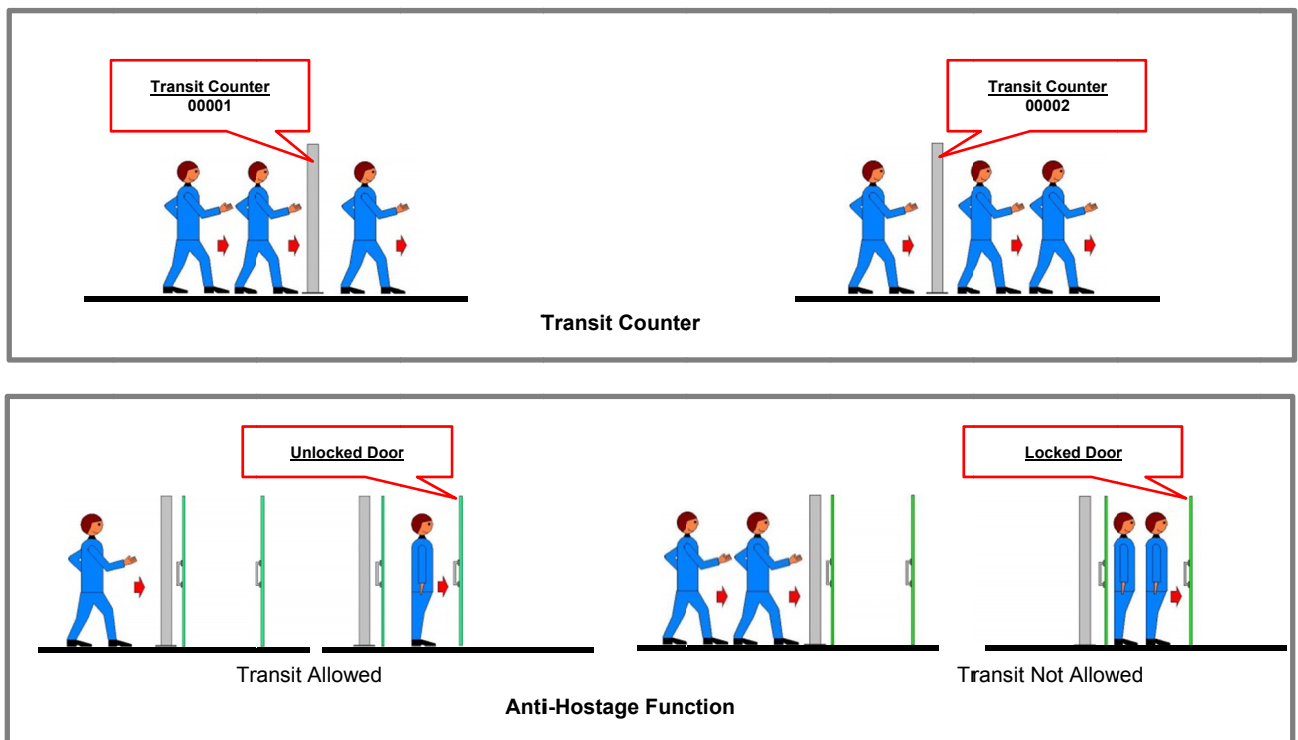

Suitable for use in small environments.

Entirely configurable operating mode:

a) anti-hostage; b) transit counter.

FOXPASS II Anti-hostage control system and/or transit counter

- **FoxPass II** is the sole system able to verify the transit of only one person at a time, it is absolutely required to check both pre-existing and new accesses in Financial Institutes, Banks, Safety Vaults, Software Houses, State Buildings, Embassies, Consulates, Nuclear Power Stations, Oil or Mine Platforms, Institutes for Research, High Security Areas, etc.
- Interfaceable with any traditional or Biometric access control, **FoxPass II** allows single transits only if the person has been recognized by these systems and also it carries out the real check of how many people have been transiting both in entrance and in exit way, as a whole, increasing its applications to Airports, Museums, Trading Centres, Supermarkets, Factories, Hospitals, etc.
- Possibility to integrate a personalized speech synthesis, which can guide the user during the use phases.
- **FoxPass II** system is available with 4 different working typologies:
 - a) FoxPass II configured as Anti-hostage and/or Stand-alone Transit Counter System.
 - b) FoxPass II configured as Centralized Anti-hostage System.
The centralization is made by means of an Analogue I/O interfacing card -> LAN Ethernet so to allow the system dialoguing through a dedicated software.
 - c) FoxPass II configured as Centralized Transit Counting System.
The centralization is made by means of an RS232 interfacing card -> LAN Ethernet so to allow the system dialoguing through a dedicated software.
 - d) FoxPass II configured as Centralized Transit Corner + Anti-hostage System.
The centralization is made by means of an RS232 interfacing card -> LAN Ethernet so to allow the system dialoguing through a dedicated software.
